Dallas, TX

SKILLS

Languages: Scala, JavaScript/TypeScript, SQL, C++, Python

Technologies: React.js, Next.js, Node.js, PostgreSQL, MongoDB, GraphQL, AWS

WORK EXPERIENCE

Tillion Digital

Tech Lead

2021 - Present

- Developed and maintained backend APIs for a ticket sales dashboard
- Wrote and optimized SQL queries that read and write billions of rows
- Created and maintained systems that distribute, price, and fulfill tickets on various 3rd party marketplaces using Scala
- Worked with clients and a designer to create new frontend features for our application in React
- Worked with our devops engineer to build and deploy through CircleCI and run our jobs through ECS, Lambda, and Airflow
- Analyzed production issues with tools such as Splunk and Cloudwatch
- Led a team and took responsibility for coordination between developers, management, and clients

Lockheed Martin

Associate Software Engineer

2019 - 2021

- Developed C++ software models for F-16 flight simulators
- Redesigned simulation UI and other tools using GTK in C++/Python
- Created tools for QA to streamline testing procedures
- Investigated and fixed bugs in production code
- Drove the transition from waterfall to agile by training coworkers on story creation and management
- Wrote guides on code organization and team workflow to help new hires

EDUCATION

Texas A&M University

B.S. in Computer Engineering (GPA: 3.6)

2018

Minor: Japanese

Osaka University (Osaka, Japan study abroad)

2017

Certification: Japanese Language Proficiency Test N2

PROJECTS

Budget.City (JavaScript | Next.js) [[Code](#)][[Website](#)]

- Developed an open source website to make municipal finances easier to understand by illustrating and explaining audited reports for 30+ Dallas-Fort Worth area cities

Clash.Tips (JavaScript | Next.js, MongoDB) [[Website](#)]

- Created and continue to maintain a web app for viewing League of Legends tournament statistics to help draft strategies against upcoming opponents
- Interface with official game APIs and store aggregate data in MongoDB's Atlas Cloud

Open Sidewalk Map (JavaScript | Next.js) [[Code](#)][[Website](#)]

- Created a website to pull sidewalk geometry and display it over satellite imagery

RS Clicker (JavaScript | Phaser) [[Code](#)][[Website](#)]

- Developed a RuneScape themed clicker game. Defeat different enemies, collect items, level up skills, and unlock new areas
